

Figure 1: A line graph showing the sleep/wake cycle of a subject. The y-axis represents the state (0 = sleep, 1.0 = awake) with a dashed line at 0.7. The x-axis shows time from 04:00:00 to 11:00:00. A solid black line shows the subject's activity, and a blue step function shows the ground truth. The subject's activity peaks around 08:00:00 and 11:00:00.
